1.- Mediante los cambios de Plano de Proyección correspondientes, transformar la recta dada en recta de punta.

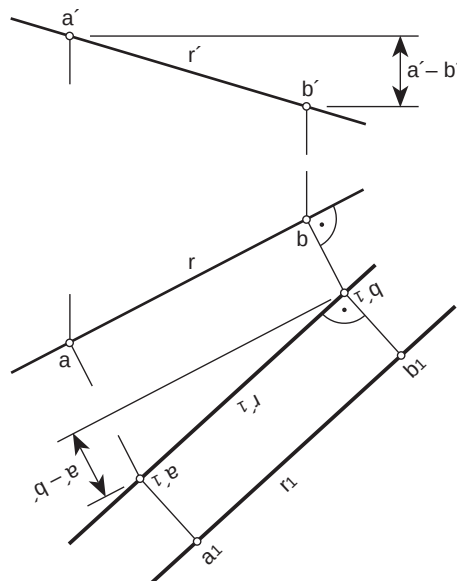

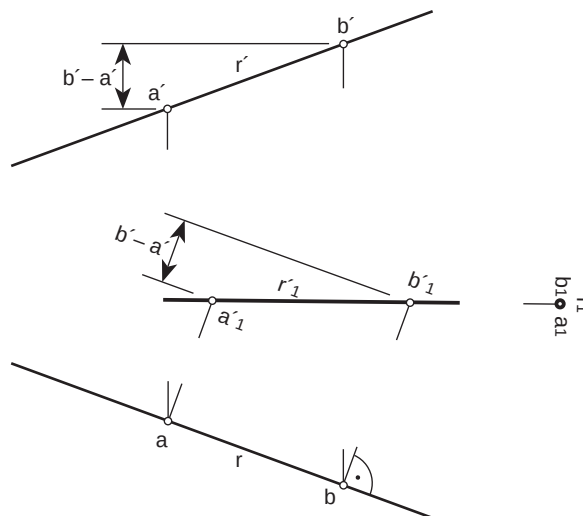

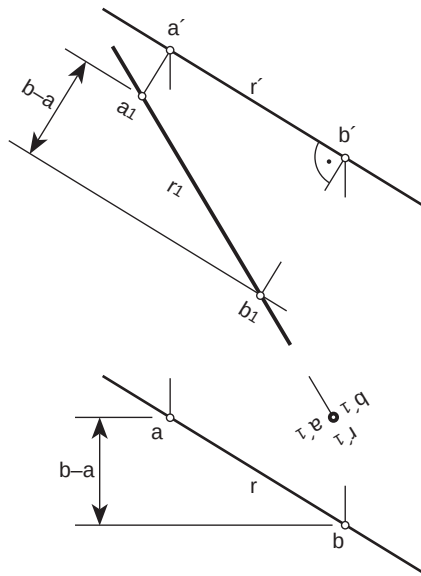

2.- Mediante los cambios de Plano de Proyección correspondientes, transformar la recta dada en recta vertical.

3.- Mediante los cambios correspondientes, transformar la recta dada en recta paralela a los Plano de Proyección.

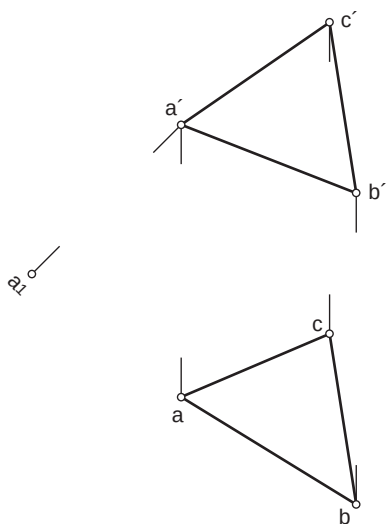

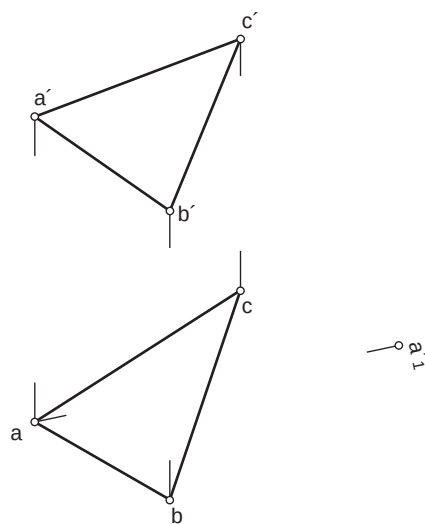

Resolver los cambios de Planos de Proyección propuestos en cada caso para los planos dados.

1.- Mediante los cambios de Plano de Proyección correspondientes, transformar el plano dado en plano paralelo al plano horizontal.

2.- Mediante los cambios de Plano de Proyección correspondientes, transformar el plano dado en paralelo al plano vertical.

3.- Mediante los cambios correspondientes, transformar el plano dado en plano de perfil.

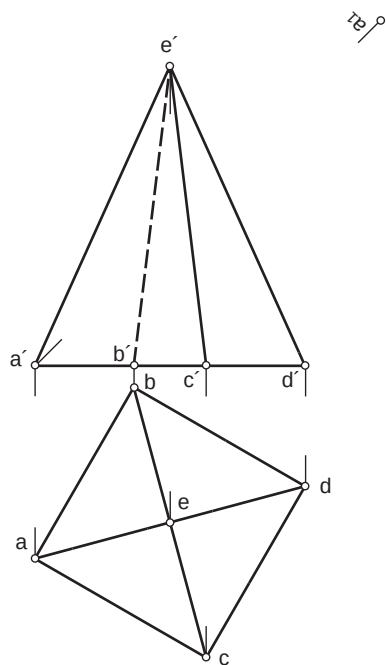

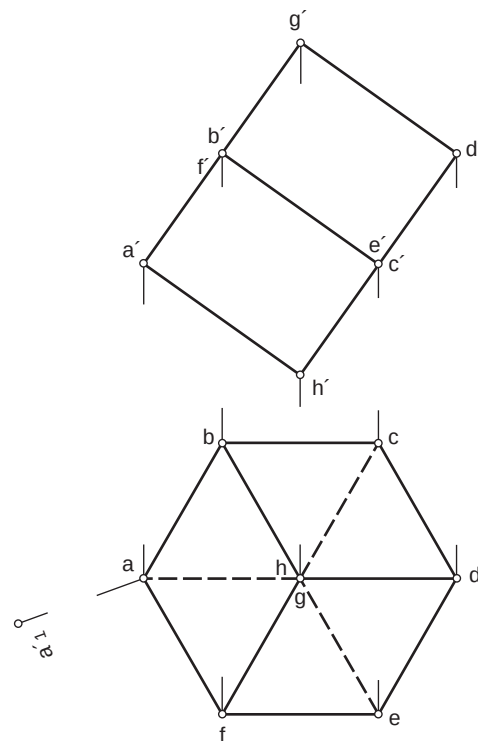

Aplicar a las superficies dadas los cambios de planos de proyección propuestos. Dibujar las partes vistas y ocultas de las nuevas proyecciones.

ALUMNO:

ESPECIALIDAD:

NÚMERO:

Mediante los cambios correspondientes, transformar la diagonal D (B–H) del cubo dado en perpendicular al plano horizontal. Dibujar las partes vistas y ocultas del cubo tras aplicarle los mismos cambios.
